

SHARK TANK INDIA – INDUSTRY-WISE INVESTOR TRENDS

Analysis of Startup Investment and Deal Patterns

Include:

- Name: Maythilee bhilare
- Dataset: Shark Tank India
- Tools: Python, Pandas, Tableau

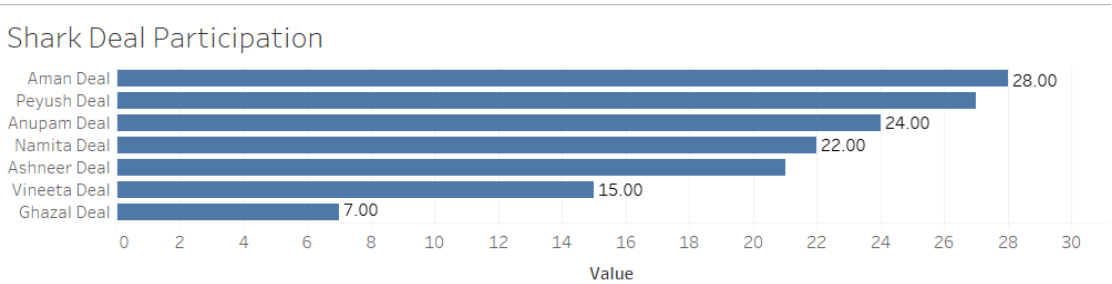

1. Industry-wise Total Investment

Industry	Startups	Deals	Total Investment
Technology & Digital	31	19	1,320
Food & Beverage	26	13	635
Fashion & Lifestyle	13	8	395
Healthcare & Medical	9	5	266
Home & Household	4	3	200
Other	14	4	175

Observation: Technology & Digital received the highest total recorded investment of 1,320 across 19 deals. Food & Beverage followed with 635 across 13 deals. Fashion & Lifestyle recorded 395 across 8 deals. This indicates that technology-oriented and consumer-oriented businesses represented a substantial share of investment in the analyzed dataset.

2. Investor Trends

Shark Deals

Aman 28

Peyush 27

Anupam 24

Namita 22

Ashneer 21

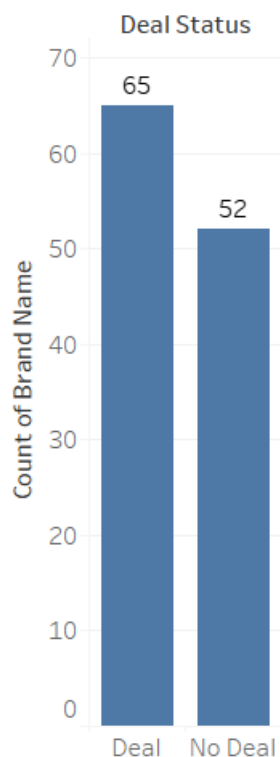

Vineeta 15

Ghazal 7

Observation: The dataset records different levels of deal participation across sharks. Aman has 28 recorded deals, followed by Peyush with 27 and Anupam with 24. These figures describe participation in the supplied dataset and should not be interpreted as a ranking of investor quality.

3. Deal Success Pattern

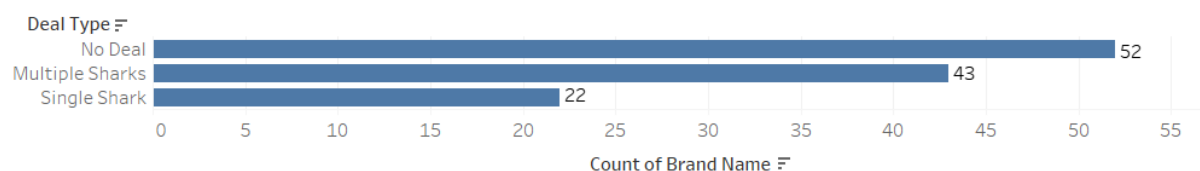

Deal vs No Deal

Observation: Out of 117 startup pitches, 65 received a deal while 52 did not. The overall deal rate was 55.56%. This indicates that more than half of the pitches in the analyzed dataset resulted in a recorded investment.

4. Startup Deal Pattern

Startup Deal Pattern: Single vs Multiple Sharks

Observation: 43 startups received investment from multiple sharks, while 22 received investment from a single shark. Multiple-shark deals therefore

represented the larger share of recorded deal structures.
